

Joinery Detailer and CAD Programmer

Jones & Sandford Joinery Ltd is an enthusiastic team manufacturing and installing commercial joinery to a wide range of locations in NZ. We are New Plymouth based with a modern factory and latest technology.

Our continuing growth means we are looking for an additional Joinery Detailer and Programmer to join the team in New Plymouth.

Your key responsibilities will include the following:

- Converting architects drawings into detailed workshop drawings, material lists & CNC programs
- Engaging subcontractors and ensuring timely delivery of materials and services
- Managing delivery of the project to the factory within the timeframes set
- Working closely with our Auckland and Wellington based regional managers.

To be considered for this role you will need:

- To have experience as a joiner /cabinet maker with a CAD programming experience.
- Effective people, planning and problem solving skills
- Good Math's & English competency

Candidates, who are also trade qualified, skilled in Cabinet Vision and/or have relevant experience in client project management, are particularly encouraged to apply.

For a confidential conversation call Roger Jones (027 4439 416) or Dave Roskilly (06 7599 251)
